FOREWORD

I take much pleasure in presenting the 19th Annual Report, for the period 2017-2018, to the minister of Labour, Industrial Relations and Employment Creation, in terms of Section 16 of the Affirmative Action (Employment) Act, No. 29 of 1998.

It is now 28 years since Namibia attained its independence from the South African Apartheid administration and 19 years since the promulgation of the Affirmative Action (Employment) Act, No. 29 of 1998, which is aimed at transforming the workforce that, at the time, mirrored the marginalisation of employees other than Whites. The Namibian workforce was then characterised by a disproportionate distribution of jobs, incomes and occupations along racial lines. However, the employee statistics gleaned from the employers' affirmative action reports during the period under review, revealed that the objective of transforming the Namibian workforce into an equitable and a demographically representative one, has not yet been achieved. There is therefore, a need for a thorough reflection and deliberate refocus on new implementation strategies of affirmative action programmes at every workplace for better results. It is not acceptable that after 19 years of affirmative action implementation that White employees, who constitute a mere 4% of the workforce, occupy 56% of positions at the Executive Director level and 26% of management positions.

This fundamental failure to transform the disproportionate share of positions at the three topmost occupational levels, should be squarely placed on the management of mostly white owned businesses in the private sector. The White management takes employment decisions that are

influenced by racial prejudice and by so doing, they deliberately maintain the management profile that is skewed towards the White race. The challenge therefore, is that even though the employment equity legislation seeks to achieve the total transformation of the workforce composition that mirrors the White dominated management, the racial bigots do not appear to be ready to embrace the government's transformation agenda of an inclusive and racially diverse workforce

Another challenge the Commission has to grapple with since the inception of this oversight body, is the apparent lack of goodwill on the part of employers to afford persons with disabilities equal opportunity. They are underrepresented at almost every occupational level despite the Commission's rigorous effort to sensitize employers to the apparent discrimination against persons with disabilities. The Affirmative Action (Employment) Act, provides for the preferential consideration of persons with disabilities as is the case with other designated groups when employment opportunities become available. However, employment and promotion statistics continue to show marginal improvement in the representation of this vulnerable group. Even though the Commission could, in terms of the law, press charges against any employer who, through their employment decision, discriminates against any person, it is relatively difficult to prove a case of discrimination unless a complainant comes forward to lodge a complaint of discrimination against a specific employer.

I must however, hasten to point out that even though the statistical figures gleaned from employers' affirmative action reports during the 19 years of affirmative action implementation have shown slow progress toward the desired level of equity in employment, it is not all doom and gloom for our national programme of affirmative action. The country needs only transformational leaders and transformational management that will give fresh impetus to Namibia's agenda of transformation in employment.

MIL

VILBARD T. USIKU

EMPLOYMENT EQUITY COMMISSIONER

VISION

The Employment Equity Commission's Vision is -

To achieve employment equity through the elimination of employment barriers against persons in designated groups.

MISSION

To ensure that all categories of employment within the workforce of every relevant employer reflect our national demographic profile.

OUR OPERATIONAL VALUES

In performing our duties we will operate with the following values:

Transparency

 We shall strive, at all times, to conduct our business in strict adherence to the principles of democracy and transparency.

Confidentiality

 We shall treat information that might endanger national security or cause damage to any relevant employer or person, with strict confidentiality.

Objectivity

 We commit ourselves to discharging our statutory duties honestly, impartially, evenhandedly, reasonably and fairly.

Justice

 We shall perform our functions in strict compliance with the principle of administrative justice.

Quality

 We shall discharge our statutory duties diligently, effectively, professionally, promptly and in a cost-effective manner.

EMPLOYMENT EQUITY COMMISSION-CUSTOMER SERVICE CHARTER

The Employment Equity Commission Customer Service Charter shall function within the framework of the Affirmative Action (Employment) Act, No 29 of 1998, and the Public Service Charter of the Republic of Namibia.

CORE FUNCTION OF THE EMPLOYMENT EQUITY COMMISSION

To inquire into whether a relevant employer has adopted, and is implementing an affirmative action plan, and whether any particular affirmative action plan or affirmative action measure meets the objects of the Act, and to take actions prescribed by or under the Act in regard thereto.

To advise any person, body, institution, organisation, or interest group, on matters pertaining to the objects of the Act.

THIS CHARTER:

- Sets the standards of service you can expect from the Employment Equity Commission.
- Articulates our commitment to providing quality, effective, efficient and fair service.
- Outlines our modus operandi.
- Sketches out our expectations from you.

WE COMMIT OURSELVES TO:

- Provide the necessary advice, assistance and guidance to relevant employers, designated groups and employees, in furtherance of the principles of equity and equality in the workplace.
- Taking all necessary measures to encourage and urge all relevant employers to effect good employment practices.
- Ensuring that all relevant employers adopt and implement affirmative action plans consistent the with Affirmative Action (Employment) Act.

WE SHALL STRIVETO PROVIDE THE FOLLOWING STANDARDS OF SERVICE:

- We shall appoint a Review Officer within ten (10) days after submission of an affirmative action report.
- We shall finalise the review of an affirmative action report within ninety (90) days of its submission to the Commission.
- We shall give you feedback, on the state of your report, when it is applicable, within thirty (30) days after the review by the Commission.
- We shall acknowledge receipt of, and respond to all correspondence within 10 (ten) working days.

• We shall attend to any complaint brought to our attention within twenty (20) days.

OUR EXPECTATIONS FROM RELEVANT EMPLOYERS:

- To strictly respect and observe prescribed deadlines.
- To submit complete and accurate affirmative action reports that meets all requirements of the Act.
- To comply with the provisions of the Act.

EXECUTIVE SUMMARY

This 19th Annual Report of the Employment Equity Commission covers the review period 1April 2017 to 31 March 2018.

The Commission was pleased to record yet another improved rate of compliance by relevant employers, as the number of affirmative action reports received by the Office and the number of employees covered by affirmative action programmes at workplaces countrywide showed an upward trend during the 2017-2018 review period.

A total of 923 relevant employers submitted their reports to the Commission during the period under review, an increase of 5% in the number of affirmative action reports received during the previous corresponding review period. Similarly, the number of employees covered by affirmative action reports received by the Office increased by 5% compared to the 263 720 employees reported on during the previous corresponding review period. Only 0,4% employees reported on were persons with disabilities, while 46% of the workforce were women and 1% were non-Namibians. White employees accounted for 56% of positions at the Executive Directors level, unchanged from the percentage of Executive Directors recorded during the previous corresponding review period.

Even though the previously racially disadvantaged comprised 94% of the total workforce reported on during the 2017-2018 review period, they accounted only for 30% of Executive Directors, while 21% were women and 13% non-Namibians. The previously racially disadvantaged accounted for 63% of managerial positions. However, White employees who comprised only 4% of the workforce accounted for 29% of positions at the management levels. This disproportionate racial composition of managers has been consistent over the years and is therefore, a

cause for serious concern as it became apparent that racial prejudice continues to influence employment decisions in favour of White candidates and thus perpetuating White controlled management.

We are pleased to report that the Case Management System has improved the communication link between the Office of the Commission and the designated employers. Registration of affirmative action reports that are submitted annually by employers is now done through the computerized system and the appointment of review officers assigned to review the employers' reports is now done online. The online communication with employers has made the administration, accessing and retrieval of data and records very efficient and convenient. The manual system the Office had used before the roll-out of the computerized Case Management System has now been phased out.

Due to limited funds, the Commission scaled down the frequency of its workplace visit in order to reduce costs. The Office encouraged employers and workers to visit the Commission's website: www.eec.gov.na, in order to access the information which would enable them to fulfil their obligation under the law. The online communication through the Case Management System made it also possible for the Office to address employers' queries online, thus making on site visits less necessary.

The Commission has identified some provisions of the Affirmative Action (Employment) Act that need legislative redress and submitted the proposed amendments to the line Minister for his consideration. The proposed amendments, if approved by Parliament, would close the identified loopholes and strengthen the Act's capacity to enforce employer compliance with the law.

MEMBERS OF THE EMPLOYMENT EQUITY COMMISSION INTRODUCTION

The Employment Equity Commission is a statutory body established in terms of section 3 of the Affirmative Action (Employment Act, No. 29 of 1998). The Commission has a statutory obligation, in terms of Section 16 of the Act, to submit an annual report to the Minister responsible for Labour. The core mandate of the Commission is to have oversight of the implementation of affirmative action at the workplace.

This 19th Annual Report of the Commission is therefore, a descriptive account of the activities carried out by the Commission and the statistical analysis of the workforce profile data gleaned from the employers' affirmative action reports received during the 2017-2018 review period. The analysis of these statistical data would establish trends that emerged during the period under review which eventually, would determine as to whether there has been an improvement in the representation of persons in designated groups, especially at the top and decision-making levels of employment.

The success of the affirmative action programme is mainly determined by the level of compliance by employers. Compliance by employers is normally measured through evidence of the employers'efforts to meet the requirements of the Act. Chief amongst the requirements is the preparation of a three year Affirmative Action Plan in close consultation with employees, which is submitted to the Commission annually, as part of the employers' annual affirmative action report.

The Commission is relatively satisfied that a significant measure of employers showed their wiling cooperation to comply with their legal obligation in terms of the Act, by submitting affirmative action reports that meet the requirements of the Act. However, statistical analysis of the workforce profile figures revealed that a satisfactory level of equity has not yet been achieved. It is especially the private sector that has yet to demonstrate its goodwill to bring about meaningful change in the workforce demographic distribution, especially at the three top occupational levels that continue to mirror the legacy of marginalization along the lines of race, gender and disability. The Commission should

therefore, not relent in its efforts of driving the transformation agenda in the employment sector.

ACTIVITIES OF THE YEAR UNDER REVIEW

COMMISSION MEETINGS

While executing its oversight mandate, the Commission held eight (8) meetings during the 2017-2018 review period. The Commission usually meets to, among other things, consider recommendations from review officers in respect of affirmative action reports assigned to them in terms of the Act. In addition to the Commission meetings, five (5) Committee meetings were also held to perform delegated functions in terms of the enabling legislation.

A total of 923 affirmative action reports were received from relevant employers during the 2017-2018 review period, covering 263 720 employees. The figures represented an increase of 5% in both the number of reports received and the number of employees covered by the affirmative action reports received during the period under review as compared to the figures recorded during the previous corresponding review period. However, the representation of persons with disabilities in virtually all industrial sectors countrywide, is still very disappointing as only 0,4% of employees covered by the reports received during the 2017-2018 review period, were persons with disabilities. The under-representation of persons with disabilities confirmed the assertions by bodies representing persons with disabilities that they were discriminated against. Women accounted only for 46% of the number of employees reported on during the 2017-2018 review period, while 1% of the workforce were expatriates. White employees occupied 56% of positions at the Executive Directors level, even though they comprised only 4% of the workforce. The figures confirmed that real transformation was not taking root at the top levels that matter in terms of decision making and improved levels of income and benefit.

Workforce profile statistics countrywide indicate that White employees are dominant at the three upper occupational levels in most sectors. This disproportionate racial composition of managers has been consistent over the years and is therefore, a cause for serious concern as it became apparent that racial prejudice continues to influence employment

decisions in favour of White candidates, thus perpetuating the skewed distribution of positions in favour of White employees. This unfair and unequal distribution of jobs at the top occupational levels must be confronted by all stakeholders. The workplace Affirmative Action Committee should be the structure which should advise management on the steps to be taken in order to take the necessary steps that would translate into the equitable representation of all racial groups and all designated groups. Such advice should essentially be informed by the employers' three year affirmative action plan and the set numerical goals.

CASE MANAGEMENT SYSTEM

THE Office of the Employment Equity Commission completed its migration from the manual handling of reports and documents to the computerized case management system. The new electronic system has improved the communication link between the Office of the Commission and the designated employers. Registration of employers' annual affirmative action reports is done through the electronic system and the appointment of review officers who review the affirmative action reports, is also done on line with the simultaneous online posting of a copy of the review officer so appointed, to the employer concerned. The online communication with employers, has made the administration and retrieval of data and records, efficient and easily accessible. The manual system the Office had used before the roll-out of the case management system has now been phased out.

WORKPLACE VISITS

Due to the budgetary constraints, the Commission scaled down the frequency of its workplace visits in order to reduce costs. The Office, instead encouraged employers and workers to visit the Commission's website: www.eec.gov.na, in order to access the information which would enable them to fulfil their obligation under the law. The online communication, through the case management system, made it also possible for the Office to attend to employers' queries and requests online, thus making workplace visits less necessary.

POLICY REFORM – AMENDMENTS TO THE ACT

The Commission identified some provisions in the Affirmative Action (Employment) Act, No. 29 of 1998, which need legislative redress and submitted proposed amendments to the line Minister for his consideration. The proposed amendments, if approved by Parliament, would close the identified loopholes and strengthen the Act's capacity to enforce employer compliance with the law.

COMPLAINTS RECEIVED BY THE OFFICE

The Office of the Employment Equity Commission received several complaints, mainly from workers, alleging unfair discrimination. The complaints lodged with the Commission alleged unfair discrimination relating to the following:

- 1. Racial bias in employment decision towards White candidates, whereby white controlled management were alleged not to consider candidate impartially and without bias when adjudicating on applications for appointment or promotion.
- 2. Complainants also alleged discrimination in terms of pay and service benefits. Employees cited examples of remuneration practices whereby white employees were alleged to enjoy service benefits such as housing allowance, transport or car allowance, which their black counterparts did not enjoy even though they belonged to the same or equivalent occupational level. They further alleged that some employers did not comply with the principle of pay equity as employees doing work of equal value were not paid in terms of the provisions of the Labour Act governing the principle of pay equity.
- 3. Some workers also complained about unfair discrimination in terms of disciplinary action taken against offending employees. They alleged that the misconduct cases of white employees were deliberately overlooked, while black employees were disciplined and even dismissed for what they termed "trivial misdemeanour" and worse even, trumped-up charges.
- 4. Persons with disabilities lodged complaints with the Commission alleging unfair discrimination on grounds of disability. They claimed that employers sometimes placed advertisements in newspapers

encouraging persons with disabilities to apply, while they had no genuine intention to hire them, as they did not even shortlist them for interviews to give them a reasonable chance to present their case for the employer's consideration.

- Some employees also lodged complaints with the Commission citing verbal abuse at the workplace by what they referred to as white racists who hurled racial insults at them without any provocation.
- 6. The Commission also received complaints about unfair discrimination and gender stereotyping at the workplace in particular and on the labour market in general. They alleged that they were overlooked when they applied for positions or promotion opportunities. Women therefore, alleged that they did not enjoy equal employment opportunities enjoyed by their male counterparts.

The complaints enumerated above confirmed that Namibian citizens do not enjoy equal employment opportunities as envisaged by labour and employment laws. The complaints also confirmed that the scourge of racism continued to influence

employment decisions in the white owned corporates in Namibia, while the verbal abuse and racial insults to black employees fermented racial and industrial tensions at the workplace. These conclusions were drawn from the investigations the Office conducted into the complaints lodged with the Commission. Even though some discrimination allegations were found to be premised on perceptions rather than on facts and hard evidence, the majority of reported cases of discrimination was found to be credible and warranted action in terms of the law.

TERM OF OFFICE OF THE 5TH COMMISSION

The term of office of the 5th Employment Equity Commission came to an end on 31 March 2018. The process of appointing the 6th Employment Equity Commission was already put in motion. The Office of the Commission would like to commend the tremendous contribution made by individual members in furtherance of the objectives of affirmative action and employment equity and wish them well in their future endeavours, while it looked forward to the appointment of the new members of the Commission.

The Minister of Labour, Industrial Relations and Employment Creation, Erkki Nghimtina, inaugurated the 6th Employment Equity Commission and called upon Commission members to hit the ground running.

CASES REGISTERED BY THE COMMISSION AGAINST DEFAULTING RELEVANT EMPLOYERS

| | Status of complaint | | | | | | |
|--|---------------------------|---------|-----------------------|----|-------|--|--|
| Nature of complaint | Still under investigation | Charged | Charged and finalized | | Total | | |
| Failure to submit AA report | 1 | 0 | 8 | 1 | 10 | | |
| Late submission of further AA report | 43 | 15 | 15 | 9 | 82 | | |
| Failure to rectify identified shortcomings | 0 | 0 | 0 | 1 | 1 | | |
| Total | 44 | 15 | 23 | 11 | 93 | | |

In total, 62 cases were registered during the 2017-2018 review period, of which 14 relevant employers were charged, 2 charges were withdrawn, 1 relevant employer paid an admission of guilt fine and 45 of the registered cases are still under investigation. During the 2017-2018 review period, 32 cases registered in the previous corresponding review period were finalized, 22 relevant employers paid admission of guilt fines and 10 charges were withdrawn. The average admission of guilt fine paid by relevant employers is N\$ 4 000.00, with the highest admission of guilt fine recorded being N\$ 12 000.00.

A panoramic view of continuous consultations between the Employment Equity Commission and its stakeholders.

Relevant employers reported on an aggregated total of 277 745 employees across all industrial sectors during the 2017-2018 review period, representing an increase of 5% in the number of employees recorded during the previous corresponding review period. Persons with disabilities comprised only 0,4% of employees reported on during the period under review, while 46% were women and 1% were non-Namibians. White employees accounted for 56% of positions at the Executive Directors level, unchanged from the percentage of Executive Directors recorded during the previous corresponding review period. Even though the previously disadvantaged comprised 94% of the total workforce reported on during the period under review, they accounted only for 30% of Executive Directors, while 21% were women and 13% of Executive Directors were non-Namibians. The previously racially disadvantaged accounted for 63% of managerial positions, however White employees who comprised only 4% of the total workforce, accounted for 29% of positions at management levels. This disproportionate racial composition of managers has been consistent over the years and should be redressed.

Workforce Profile Trend over 100 years

The above Table and accompanying graph indicate the trend in the total number of employees reported on by relevant employers over the last 10 review periods. The graph indicates that from 2008-2009 to 2013-2014, the total number of employees reported on were mostly consistent, with only slight variances. The 2014-2015 review period, however indicates the lowest number of employees reported on over the

10 year period. However, during the 2017-2018 there was an increase of 81% in the number of employees reported on by relevant employers from the number reported on during the 2014-2015 review period. During the 2017-2018 review period, there was a whopping increase of 75% in the number of women reported on during the 2008-2009 review period.

The Construction Sector, in aggregate, recorded 12 125 people employed in the sector (across the industry), representing a further drop in employee number of 6% compared to those recorded during the previous corresponding review period. The drop in the number of employees in the sector might be attributed to the drop in building activities due to economic challenges. Persons in designated groups comprised 93% of the workforce in the Construction Sector, while only 14% were women and 0,4% were persons with disabilities.

Welfare Sector reported on a workforce comprising 2 485 employees across the industry, an increase of 23% in the number of employees reported on during the previous corresponding review period. The Health and Welfare Sector is naturally the preferred career choice of women, it was no surprise that women made up 74% of the workforce in the sector, however only 0,4% of employees in that sector were persons with disabilities and 13% were non-Namibians. Even though women accounted for 74% of employees, only 66% of managers were women in the Health and Welfare Sector.

The Wholesale and Retail Sector reported to have trained 15 145 employees during the 2017-2018 review period, 38% more than the number reported trained during the preceding review period. Persons in designated groups accounted for 96% of employees trained and 53% were women, while only 0,3% were persons with disabilities.

CONCLUSION

The 19th Annual Report of the Employment Equity Commission has not only provided a descriptive account of the activities of the Commission during the 2017-2018 review period, but has also revealed the picture of the ground that has been covered towards the desired level of equity in employment since the Act was promulgated in 1998.

The Affirmative Action (Employment) Act intended, first and foremost, to ensure that no person shall be denied employment opportunity for reasons unrelated to ability. It was enacted to ensure that all persons were entitled to enjoy equal employment opportunities in every respect. The 2017-2018 Annual Report reflects the current workforce demographic distribution which clearly showed a satisfactory departure from the workforce profile demographics that clearly mirrored the past racial, gender and disability discrimination. However, the under-representation of persons in designated groups at the top occupational levels is a stark reminder of the challenges and the hard work that lie ahead before a meaningful level of workforce transformation is achieved. The Commission and all other stakeholders are therefore, called upon to rise to this challenge in furtherance of employment equity objectives.
